

Hydrological Forecasting *Data, Modelling and Applications*

Training workshop
Accra, Ghana
27th-29th January 2026

NATIONAL CAPABILITY
FOR GLOBAL CHALLENGES

[\[Workshop close\]](#)

Training aim

***Strengthen practical skills in hydrological forecasting,
from data access and exploration to modelling and
operational forecast applications***

**Hydrological
Datasets**

**Water
Resources
Modelling**

**Seasonal
Forecast
Applications**

Next steps

Post-training survey

*We'd be really grateful if you did this before
you leave (should only take 5-7 mins!)*

You will get:

- A certificate of completion by email
- A copy of the group photo
- An email with the links to all the materials including the slides (materials will be updated in 1-2 weeks)

**We hope to see you again and work
with you in the future**

**We would love to hear your feedback
on the training this week so we can improve
and expand the training in the future**

Thank you
